~~COMPUTE MODULE and IO BOARD~~
designed using Cadence Io Pi

The IO Pi Plus is a 32 channel digital expansion board designed for use on the Raspberry Pi. The board is based around the MCP23017 16-bit I/O expander from Microchip Technology Inc. A pair of MCP23017 expanders are included on the board allowing you to connect up to 32 digital inputs or outputs to the Raspberry Pi.

IO Pi Plus - 32 Channel Port Expander for the Raspberry Pi

The IO Pi is a 32 channel digital expansion board designed for use on the Raspberry Pi computer platform. The board is based around the MCP23017 16-bit I/O expander from Microchip Technology Inc. A pair of MCP23017 expanders are included on the board allowing you to connect up to 32 digital

IO Pi - AB Electronics UK

Driving Relays or higher loads with the IO Pi The output from the IO expansion boards can drive up to 25mA per channel but to drive higher loads such as relays or some opto-isolators you will need to boost the output using a transistor or mosfets. The circuit below shows how you can operate a 5V coil relay using either a GPIO output from...
