~~Jaso Standard~~

The Japanese Automotive Standards Organization (???????, Nihon Jid?sha Kikaku, JASO) is an organization that sets automotive standards in Japan, analogous to the Society of Automotive Engineers (SAE) in the United States.

~~Japanese Automotive Standards Organization - Wikipedia~~

JASO (Japanese Automotive Standards Organization) is an organization consisting of major vehicle manufacturers in Japan. It was created as the Japanese equivalent to the API (American Petroleum Institute) specifications because those were not suitable for the unique specification needs of modern Japanese engines.

~~What does the JASO oil specification mean?~~

Japanese motorcycle manufacturers found the limits demanded by the API TC specifications too loose. Oils meeting the API TC standard still produced excessive smoke and could not prevent exhaust blocking. Therefore the Japanese Engine Oil Standards Implementation Panel (JASO) introduced the following specifications:

~~JASO Oil Specifications - oilsSpecifications.org~~

What is the JASO standard? The Society of Automotive Engineers of Japan (JSAE) developed the JASO T 904 standard to classify oils by their ability to provide good wet-clutch lubrication and performance, helping enthusiasts select the right oil for their motorcycles and dirt bikes. What does the JASO standard measure?

~~What's the Difference Between JASO MA and JASO MA2 Oil ...~~

JASO M345 is a quality classification standard for two stroke engine oils for engines of Japanese origin. It was introduced by the Japanese Automotive Standards Organization (JASO) in 1994 as JASO M345-93 with the quality levels JASO FA, JASO FB and JASO FC - with FC setting the highest standard.

~~JASO M345 - Wikipedia~~

The JASO Engine Oil Standards Implementation Panel consists of six organizations; Petroleum Association of Japan (PAJ), Japan Automobile Manufacturers Association, Inc. (JAMA), Society of Automotive Engineers of Japan, Inc. (JSAE), Land Engine Manufacturers Association (LEMA), Japan Lubricating Oil Society (JALOS), and Japan Boating Industry Association (JBIA) as well as other concerned companies (lubricant additive manufacturers).

~~JASO Engine Oil Standards Implementation Panel~~

The Japanese Automobile Standards Organization (JASO) is an industry organization and specification setting body for lubricants designated for use in a broad range of Japanese hardware.

~~JASO Oil Specifications - Updates and Insights~~

The motor oils that meet the JASO T 903:2006 standard can be classified into four grades: JASO MA, JASO MA1, JASO MA2 and JASO MB. The classification is based on the results of the JASO T 904:2006 clutch system friction test.

~~JASO MA and JASO MB classifications - oilsSpecifications.org~~

JASO MA - This was the standard for single unit engines where the wet clutch, gearbox and engine used the same oil. JASO-MA oils don't contain friction modifiers. JASO MB - This lower standard was for bikes that use separate oils for the engine, clutch and gearbox (e.g Harley Davidson's and BMW's). Then in 2006 JASO introduced....

stitute for Automated and Connected Vehicle Standard-ization, Japan and the SIP International Cooperation WG. 6 JASO Standards Published in 2016 This section introduces the standard numbers, names, and scopes of JASO (Japan Automotive Standards Orga-nization) standards and JASO technical papers published or revised in March 2017.

~~STANDARDS - JSAE~~

Critical to understanding the unique requirements for motorcycle and scooter lubricants is JASO T903, the globally recognized standard for 4-stroke motorcycle lubricants. JASO T903 was introduced in 1998 in response to the increased use of friction modifier technology for fuel economy improvements in passenger car lubricant formulations.

~~Understanding JASO MA and MB Specific Performance for the ...~~

Later on, JALOS introduced the JASO FD specification to advance lubricant technology to an even higher standard and at the same time made the FA specification obsolete. So the three levels of performance currently in place are FB, FC and FD according to the JASO M345:2003 specification.

Choose from our selection of JIS/JASO standards washers in a wide range of styles and sizes. In stock and ready to ship.

~~JIS/JASO Standards Washers | McMaster-Carr~~

The grade JASO MB is used for a lower friction oil and MA is relatively higher friction oil. In 2006 JASO introduced the JASO MA2 standard. The MA2 standard was brought out for modern motorcycle engines. The JASO MA2 standard is a higher standard than JASO MA and means the oil is suitable for use in bikes with catalytic converters in the exhausts.

~~What does API mean? - What does JASO MA mean? - What does ...~~

The JASO Engine Oil Standards Implementation Panel was established by industrial and academic associations related with engine oil products in Japan, for the purpose of establishing JASO Engine Oil Standards in domestic and overseas markets.

~~JASO Standard | Medway Lubricants Ltd~~
