18-Tips-for-Taking-Beautiful-Jewelry-Photography

Jewelry photography lighting setups for rings Although the ring photography lighting setup looked more complicated, the key to successfully photographing rings is to ensure you minimise any reflections. With their curved, shiny surfaces, rings reflect everything — your base surface, background, even you! Diamond ring photography lighting setup

How-To-Photograph-Jewelry-A-Useful-Step-by-Step-Guide

Equipment for placing jewelry for jewelry photography Purchase a small bright white tile or piece of Plexiglas. This will serve as a base for your jewelry and the shiny surface will create a nice reflection. A cool temperature glue gun is useful for helping you to place your jewelry, on the tile carefully.

Ultimate-DIY-guide-to-jewelry-photography-tools

The jewelry has to be free of dust, dirt, debris, smudges and fingerprints. When you're shooting close to a subject, any stray bit of anything will be immediately evident when you view the images on a monitor or in a print. "Canned air is one of the most important things to have when photographing jewelry," Jody says.

Bright-Ideas-Tips-&Techniques-for-Photographing-Jewelry

Taking a photo of shiny jewelry using your camera's flash is never a good idea! The jewelry will reflect the bright light, leaving your product covered in white light spots with harsh shadows in the background, like in the two examples below.

pixie.com

The keys to good jewelry photography are sharpness, lighting, exposure, and in the case of gemstone photography, creating some sparkle. Good jewelry photography needs sharp, crisp focus. It is worth getting out your camera's manual to find out how to put the camera in "spot focus" mode.

Jewelry-photography-tips-how-to-take-pictures-of-jewelry

Follow this guide to photographing reflective products, and try a double overhead light for shooting metallic jewelry. A double overhead lighting setup can minimize reflections. Place your jewelry on a sturdy surface, like a table or a block, and position one large studio light on either side. Diffuse both lights with umbrellas.

10-Common-Jewelry-Product-Photography-Mistakes-(and-How-to)

Jewelry photography is also, by nature, considered macro photography. This means a small object becomes larger than life in a photo. Any minor flaw can look much more prominent than it actually is, according to Sara. Additionally, as a jewelry artist, you've probably thought long and hard about how you want your piece to look.
