Knowledge engagement in gene drive research for malaria ...

Malaria is a disease of tropical and subtropical regions, having been eradicated from temperate countries steadily over the last 100 years. It is transmitted by the bite of the female *Anopheles* mosquito. Disease incidence depends on environmental suitability for local vectors in terms of altitude, climate, vegetation, and implementation of control measures, and hence is inextricably linked to ...

Malaria Journal is an open access, peer-reviewed, online journal aimed at the scientific community interested in malaria in its broadest sense.

Malaria Journal - Index

Malaria is a serious disease caused by a parasite. You get it when an infected mosquito bites you. Malaria is a major cause of death worldwide, but it is almost wiped out in the United States. The disease is mostly a problem in developing countries with warm climates. If you travel to these countries, you are at risk. There
