Knowing how to read a weather map can help you understand the weather and know what to expect. For example, high pressure (H) areas will have clear skies, while low pressure (L) areas can be stormy. Blue "cold front" lines bring rain and wind in the direction the triangular marks point. Red "warm front" lines bring brief rain followed by warming in the direction of the semi-circles. If you'd ...

NOAA Weather Prediction Center. On some weather maps, you may notice lines surrounding and encircling the "highs" and "lows." These lines are called isobars because they connect areas where the air pressure is the same ("iso-" meaning equal and "-bar" meaning pressure). The more closely the isobars are spaced together, the stronger the pressure change (pressure gradient) is over a distance.

How to Read Symbols and Colors on Weather Maps

Find local businesses, view maps and get driving directions in Google Maps.

Google Maps

Obtain a weather map and distribute to students so they can see examples of a real weather map. Introduce students to the online Jetstream site and the parts of a weather map. Students will record the various parts of a station model. Locate a station model for a city and record temperature, pressure, wind speed, and so on in a data table. Describe to a partner the different conditions present ...

UNIT 6: Weather LAB 6-5: WEATHER PATTERNS INTRODUCTION: A basic principle in the Earth sciences is that energy is constantly bringing about changes. In order to understand the changing Earth, we must understand the energy systems at play within the environment which cause those changes. The study of energy interactions within the atmosphere leads to the identification of systems that can be ...
