The law of averages is the commonly held belief that a particular outcome or event will over certain periods of time occur at a frequency that is similar to its probability. Depending on context or application it can be considered a valid common-sense observation or a misunderstanding of probability. This notion can lead to the gambler's fallacy when one becomes convinced that a particular outcome must come soon simply because it has not occurred recently. As invoked in everyday life, the "law"

The law of averages is sometimes known as “Gambler’s Fallacy.” It evokes the idea that an event is “due” to happen. For example, “The roulette wheel has landed on red in three consecutive spins. The law of averages says it’s due to land on black!” Of course, the wheel has no memory and its probabilities do not change according to past results.

law of averages. The idea that probability will influence all occurrences in the long term, that one will neither win nor lose all of the time. For example, If it rains every day this week, by the law of averages we're bound to get a sunny day soon. This colloquial term is a popular interpretation of a statistical principle, Bernoulli's theorem, formulated in the late 1600s.
