Here we are with a math test on exponents. Exponents are number raised to a certain number. There are different rules set aside to determine how you solve problems involving more than one exponents or an exponent and a whole number. If you are looking for a quiz to see how well you apply the set rules to get the correct solution to a problem, this quiz is what you need.

Quiz: Exponents

Laws of Exponents. Exponents are also called Powers or Indices. The exponent of a number says how many times to use the number in a multiplication. In this example: $8^2 = 8 \times 8 = 64$. In words: 8² could be called "8 to the second power", "8 to the power 2" or simply "8 squared". Try it yourself:

Laws of Exponents - MATH

1. PRODUCT RULE: To multiply when two bases are the same, write the base and ADD the exponents. Examples: $A \cdot B = A^m \cdot B^m = A^{m+m} = A^{2m}$. C. 2.
2. QUOTIENT RULE: To divide when two bases are the same, write the base and SUBTRACT the exponents. Examples: $A \cdot B \div C = A^m \cdot B^m \div C^m = A^{m-m} \cdot B^m \div C^m = A^0 \cdot B^m \div C^m = B^m \div C^m$.
3. ZERO EXPONENT RULE: Any base (except 0) raised to the zero power is equal to one. $A^0 = 1$.
