~~M373 | Optimization | Open University~~

~~M373 was the last module of my Maths degree. It was tricky in parts but, overall, a great module. There's two things that students get frustrated with on M373: the maths software Maxima, and the middle block of the course which contains some confusing algorithmic techniques.~~

~~Optimization M373 | Module Reviews | Open University~~

~~• The solution to each free-response question is based on the scoring guidelines from the AP Reading. Where appropriate, modifications have been made by the editor to clarify the solution. Other mathematically correct solutions are possible. • Scientific calculators were permitted, but not required, on the AP Calculus Exams in 1983 and 1984.~~

~~Free-Response Questions and Solutions 1989 – 1997~~

~~This section provides the exams from the course along with practice exams, review sheets, exam solutions. Also provided are the problem sets assigned for the course along with information on format, rules, and a key to notation.~~

~~A Chinese version is also available.. 1. Introduction Particle swarm optimization (PSO) is a population based stochastic optimization technique developed by Dr. Eberhart and Dr. Kennedy in 1995, inspired by social behavior of bird flocking or fish schooling. PSO shares many similarities with evolutionary computation techniques such as Genetic Algorithms (GA).~~
