Magnetohydrodynamic Energy Conversion: Rosa, Richard J. ...
This paper presents results of cold magnetohydrodynamic (MHD) flow deceleration experiments using repetitively pulsed, short pulse duration, high voltage discharge to produce ionization in M = 3 nitrogen and air flows in the presence of transverse direct current electric field and transverse magnetic field. MHD effect on the flow is detected from the flow static pressure measurements.

Low-temperature M=3 flow deceleration by Lorentz force ...
Alan L. Fahrnbruch and 1927 Bube, Richard H. Fundamentals of solar cells : photovoltaic Solar energy conversion / Alan L. Fahrnbruch, Richard H. Bube. New York :Academic Press, 1983. [cited at p. 11]

(PDF) Magneto Hydrodynamic Power Generation (MHD) in ...
A magnetohydrodynamic generator (MHD generator) is a magnetohydrodynamic converter that utilizes a Brayton cycle to transform thermal energy and kinetic energy directly into electricity. MHD generators are different from traditional electric generators in that they operate without moving parts (e.g. no turbine) to limit the upper temperature.
