system. in simple words, the Management information system or MIS provides feedbacks to managers themselves about their performances.

12 Different Types Of Management Information Systems

An information management system (IMS) is a set of hardware and software that stores, organizes, and accesses data stored in a database. It also provides tools that allow for the creation of standardized and ad-hoc reports. There are numerous kinds of IMSs that can perform specialized business functions, including the following examples:

Management Information Systems : Managing the Digital Firm ...

A management information system is an information system used for
decision-making, and for the coordination, control, analysis, and
visualization of information in an organization. The study of the
management information systems involves people, processes and
technology in an organizational context. In a corporate setting, the
ultimate goal of the use of a management information system is to
increase the value and profits of the business. This is done by
providing managers with timely and approp
