~~Practical Guide for the Diagnosis and Management of Asthma~~

The assessment of environmental factors associated with asthma is one of the cornerstones of asthma management from the EPR-3. 2 The EPR-3 recommended that all individuals with asthma of all severities should be assessed for exposure to allergens at home and at work, for symptoms on exposure, and for sensitization either by allergy skin testing or allergen-specific IgE . The expert panel examined only the efficacy of indoor allergen strategies in mitigating critical outcomes and did not
