climatic geomorphology That branch of geomorphology which deals with the effects of climate on geomorphological processes and consequently on the character of land-forms. It has included the identification of climatically controlled zones and has attempted to define provinces with distinctive denudational processes.

~~Climatic Geomorphology | Encyclopedia.com~~

Geomorphology (from Ancient Greek: γῆ, "earth"; μῆρμα, morph , "form"; and λόγος, ló gos, "study") is the scientific study of the origin and evolution of topographic and bathymetric features created by physical, chemical or biological processes operating at or near the Earth's surface. Geomorphologists seek to understand why landscapes look the way they do, to understand ...
