The Master of Biomedical Engineering focuses on the application of engineering principles to biomedicine. Our graduates solve problems in healthcare-related fields. Master of Biomedical Engineering | UNSW Engineering

~~Master of Biomedical Engineering | UNSW Engineering~~

~~At UNSW Biomedical Engineering, we have all the technology and expertise you could ever need. > Keep in touch. We love to hear from our alumni and industry partners. See ways to keep in touch with us. > View more. High school students. Experience engineering.~~

~~Graduate School of Biomedical Engineering~~

~~Tim Broadbent, Master of Engineering Science~~ ~~Biomedical Engineering~~ ~~focuses on the adaptation and application of engineering principles to biomedicine. Graduates solve problems in a range of healthcare-relates fields such as implantable bionics, drug-delivery systems, medical imaging, radiotherapies, orthopaedic devices, telemedicine, robotic surgery, and cell and tissue engineering.~~

~~Master of Engineering Science (Biomedical Engineering) ...~~

~~The Master of Biomedical Engineering caters for students with either a medical/biological science or engineering/physical science background who want to further their education in this unique area. It is designed to apply engineering principles to developing technologies and problem solving in a diverse range of health care related fields.~~

~~Master of Biomedical Engineering at UNSW | UNSW Degree Finder~~

~~Biomedical Engineering applies engineering principles to the development of technologies and solutions in a range of healthcare-related fields, including implantable bionics, drug delivery systems, medical imaging, radiotherapy, orthopaedic devices, robotic surgery, cell and tissue engineering, physical rehabilitation and others.~~

~~Engineering (Honours)/ Masters of Biomedical Engineering ...~~

~~Biomedical Engineering applies engineering principles to the development of technologies and solutions in a range of healthcare-related fields, including implantable bionics, drug delivery systems, medical imaging, radiotherapy, orthopaedic devices, robotic surgery, cell and tissue engineering, physical rehabilitation and others.~~

~~UNSW Engineering | Innovation in action~~

~~Biomedical Engineering is the application of engineering principles to developing technologies and solving problems in a diverse range of health care related fields e.g. implantable bionics, drug delivery systems, medical imaging, radiotherapies, orthopedic devices, telemedicine, robotic surgery, cell and tissue engineering, records management, physical rehabilitation and others.~~ ~~The MBIomEdE ...~~

~~Handbook — Biomedical Engineering~~

~~Our postgraduate degrees give you the opportunity to see the bigger picture by making a career change or progressing in your current field.~~ ~~We offer over 34 engineering master degrees in more disciplines than any other Australian university. Our postgraduate degrees will help you take a leading role in the industry upon graduation.~~

~~Postgraduate | UNSW Engineering~~

~~The Department of Biomedical Engineering brings together the technical expertise of the Hajim School of Engineering and Applied Sciences with the clinical experience of our University of Rochester Medical Center to establish a cooperative environment that fosters innovations in medicine and healthcare.~~

~~Biomedical Engineering : University of Rochester~~

~~Master of Biomedical Engineering (Specialisation) Program Description~~ ~~The MBIomEdE degree program is designed to cater for students with either a medical/biological science or engineering/physical science background.~~

~~UNSW Handbook Program — Biomedical Engineering — 8660~~

~~Materials Science is the underlying science of high-performance materials such as metals, ceramics, polymers and composites. This double degree is designed for students who want to pursue a career in biomedical engineering through the technical base of materials science and engineering.~~

~~Materials Science and Engineering (Honours)/Biomedical ...~~

~~Overview~~ ~~Meet the health challenges of the future with the Master of Engineering (Biomedical) at Australia's leading university.\*~~ ~~Gain the specialist skills required to create new medical treatments, instruments and devices. \* Times Higher Education World University Rankings 2021~~
