Mike Wilks' *Mirrorscape* is a young-adult fantasy novel with a promising premise: what would the world be like if artists could actually travel into their paintings? The imagination roars with the idea and, I for one, was drawn in just by the possibilities; sadly, the execution leaves much to be desired.

I stumbled across *Mirrorscape* in a bookshop, the cover having attracted me at first and was

delighted to discover it was a Mike Wilks original. Mike has given up the brush for a pen but the change has paid dividends. This is an original piece of fantastic fiction as you'll ever read. As, in all good fantasy books, Mirrorscape's premise is simple but powerful: Paintings in the world of Nem can be entered and moved through as though they are real places.

Basically, I felt that Mike Wilks spend too much of his time basing the story in the mirror world and not enough time in the "real" world of the main characters, and

therefore the characters themselves just fell flat. For me, that's a classic sin in any kind of writing. Flat characters = Flat story, be it YA literature or anything else.
