Worksheet: Seasons, Eclipses, & Phases of the Moon

Answers ...

The moon goes through 8 major phases. A new moon is when the Moon cannot be seen because we are looking at the unlit half of the Moon. The new moon phase occurs when the Moon is directly between the Earth and Sun. A solar eclipse can only happen at new moon.; A waxing crescent moon is when the Moon looks like a crescent and the crescent increases ("waxes") in size from one day to the next.

What causes the phases of the moon? The common incorrect answer is the shadow of the Earth. The phases of the moon are actually just a result of our perception of the moon's half-illuminated surface. When the moon does pass through Earth's shadow the result is a lunar eclipse. This can be spectacular as the moon turns a deep shade of red.

What causes the phases of the moon? | TED-Ed

The lunar phase or Moon phase is the shape of the Moon's directly sunlit portion as viewed from Earth. The lunar phases gradually change over a synodic month (about 29.53 days) as the Moon's orbital positions around Earth and Earth around the Sun shift. The visible side of the moon is variously sunlit, depending on the position of the Moon in its orbit.

The Moon Lessons, Worksheets and Activities

The phase when the Moon passes between the Earth and Sun is called the new moon. The next phase of the moon is called the "waxing crescent", followed by the "first quarter", "waxing gibbous", then to a full moon. A full Moon occurs when the moon and sun are on opposite sides of the Earth. As the Moon continues its orbit it becomes a "waning gibbous", "third quarter", "waning crescent", and finally back to a new moon.

phases between should be fairly easy to visualize, as the illuminated portion gradually transitions between them. An easy way to remember and understand those "between" lunar phase names is by breaking out and defining 4 words: crescent, gibbous, waxing, and waning. The word crescent refers to the phases where the moon is less than half illuminated. The word gibbous refers to phases where the moon is more than half illuminated.

Moon Phases / Lunar Phases Explained

Best Deer Hunting Times - Deer Hunting Calendar December 2020

If you want to hunt deer in the midday, hunt during the full moon. During the full moon, deer are very active during the midday compared to any other hour of the day. That means you'll see, and possibly hunt, more deer during this time than any other -- as long as it's during the full moon cycle. Late
