DOS commands are the commands available in MS-DOS that are used to interact with the operating system and other command line based software. Unlike in Windows, DOS commands are the primary way in which you use the operating system. Windows and other modern OSs use a graphics-based system designed for touch or a mouse. MS-DOS retained the crown of most used DOS until Microsoft usurped its own OS with Windows, however there were other non-Microsoft disk operating systems (DOS) as well. DR-DOS was the primary competitor for MS-DOS and did fairly well until Windows 95 arrived. Afterwards, most people abandoned the non-GUI DOS system.
