Toxic mouse pellets use bromethalin, cholecalciferol or zinc phosphide to poison the rodent. While these poisons are effective, they are also lethal to other mammals, and there is no known antidote. Their use is best left to professionals since they pose a significant risk if improperly applied and they are regulated by law in

You can eliminate ground squirrels and rodents without harmful poisons by using a bait of one part plaster of paris to three parts raw oatmeal and placing about a cup at a time in the upright tube of this simple Rodent Bait Module built out of PVC pipe. The mixture constipates and kills squirrels and other rodents, but.
