OBD-II PIDs are codes used to request data from a vehicle, used as a diagnostic tool. SAE standard J1979 defines many OBD-II PIDs. All on-road vehicles and trucks sold in North America are required to support a subset of these codes, primarily for state mandated emissions inspections. Manufacturers also define additional PIDs specific to their vehicles. Though not mandated, many motorcycles

On-board diagnostics (OBD) is an automotive term referring to a vehicle's self-diagnostic and reporting capability. OBD systems give the vehicle owner or repair technician access to the status of the various vehicle sub-systems. The amount of diagnostic information available via OBD has varied widely since its introduction in the early 1980s versions of on-board vehicle computers.

These are some of the normal car diagnostic codes that you are likely to find on most vehicles. There are more than 5, 000 codes that are commonly used. OBD codes were standardized using SAE J2012 and ISO 15031-6 standards. All you have to do is to search for a software and download all the 5000 plus codes.
