#### Organization Of The Nervous System

The nervous system consists of two parts, shown in Figure 1: The central nervous system (CNS) consists of the brain and spinal cord. The peripheral nervous system (PNS) consists of nerves outside the CNS.

Neurons (specialized cells of the nervous system) send signals along thin fibers called axons and communicate with other cells by releasing chemicals called neurotransmitters at cell-cell junctions called synapses. Glial cells are non-neuronal cells that provide support and nutrition in the nervous system.
