situation. While dehydration and shock are separate entities, the symptoms of dehydration can help the provider to assess the level of fluid deficit and to track the effects of fluid resuscitation.

## PALS Study Guide - National CPR Association

Asystole is the “flatline” on the ECG monitor. It represents a lack of electrical activity in the heart. It is critically important not to confuse true asystole with disconnected leads or an inappropriate gain setting on an in-hospital defibrillator. Asystole may also masquerade as a very fine ventricular fibrillation.
