It's a new generation of de Wolfe Pack cubs, carrying on the tradition of their illustrious grandfather. Thomas "Tor" de Wolfe has his hands full with battling women and battling enemies as he secures a border castle for Edward I. Chaos is the name of the game! Tor married, and lost, his wife at a young age. Because his wife was an orphan, he inherited her two sisters when they wed and when she died, they became his responsibility. Unfortunately, the two spinster sisters view Tor as their property. When Tor meets the worldly Isalyn de Featherstone, he is smitten. Isalyn, however, is not. Tor is big and handsome, but lives too much of a provincial life. She wants big cities, excitement, money, and no baggage of a

dead wife. Isalyn's father, however, feels differently - and Isalyn finds herself betrothed to the gentle de Wolfe giant. The spinsters have a new target. Let the battles begin! Enter a world of medieval mayhem, adventure, but most of all, of an overwhelming passion that soon consumes both Tor and Isalyn. Add an ambitious and jilted suitor into the mix, and it could mean the end for everything they have worked so hard to build. But a strong love is worth fighting for, and no love is stronger than that of a de Wolfe. Part of the World of de Wolfe Pack series - de Wolfe Pack Generations subseries

Introducing a NEW addition to our growing library of computer science titles, Algorithm Design and Applications, by Michael T. Goodrich & Roberto Tamassia! Algorithms is a course required for all computer science majors, with a strong focus on theoretical topics. Students enter the course after gaining hands-on experience with computers, and are expected to learn how algorithms can be applied to a variety of contexts. This new book integrates application with theory. Goodrich & Tamassia believe that the best way to teach algorithmic topics is to present them in a context that is motivated from applications to uses in society, computer games, computing industry, science, engineering, and the internet. The text teaches students about designing and using algorithms, illustrating connections between topics being taught and their potential applications, increasing engagement.
