Key to an Effective Alarm System **Practical Alarm Management For Engineers**

In a plant, a DCS based Alarm Management System presents alarms to the operator at an average rate of 1 alarm per 120 seconds. It takes the operator an average of 40 seconds to respond to each alarm. The average workload (W) imposed on the operator by DCS Alarm Management System is: $W = (1 / 120) (40) = 40 / 120 = 0.333 = 33.3 \%$

Practical Alarm Management for Engineers and Technicians

Ten tips to improve alarm
management. 1. Identify
owners for every alarm, not
only for highly managed
alarms. In the early days of
alarm management, it was
recognized some alarms are
“highly managed” – usually
certain safety,
environmental or mechanical
integrity alarms.
