These are either ORIGINAL or COPIES of manuals and blueprints used when these aircraft were in active duty, now transferred into electronic format.

Pratt & Whitney R-985 Aircraft Engine Operating Manual

The Wasp Jr. R-985 was the third engine type designed by Pratt & Whitney Aircraft, following the Wasp R-1340 and Hornet R-1690, all of which were nine-cylinder engines. The Wasp Jr. was designed to compete at lower power and was virtually a Wasp of reduced dimensions, as the details of construction were followed closely throughout.

Pratt & Whitney—aircraft-manuals.com

R-985 exhaust and intake pushrods are the same part number and can be interchanged. The manual recommends marking the tips Ex for exhaust and In for intake, a practice that has been dropped over time. However, those markings still provide some excitement when a novice finds pushrod tips marked intake in an exhaust location. It s important to know whether your R-1340 engine is equipped with ...

How do I adjust the valves on my Pratt & Whitney R-985 or

The Pratt & Whitney R-985 Wasp Junior was a 9 cylinder, single-row, air-cooled radial engine with horsepower ranging from 300 hp to 450 hp, depending on the model and configuration. It was used in a range of aircraft that included the Grumman Goose, Lockheed Model 10A and Beechcraft Model 18.

Pratt & Whitney R-985 Wasp Junior—Aviation History

The Pratt & Whitney R-985 Wasp Junior is a series of nine-cylinder, air-cooled, radial aircraft engines built by the Pratt & Whitney Aircraft Company from the 1930s to the 1950s.
