Samsung Sdi 94 Ah Battery

Samsung SDI 94 Ah cell specs 6-13 After 4.600 charge/discharge complete cycles (from 0 to 100 %) at 25° C, the battery cells retain 80 % of the initial capacity. If we consider that with a full charge a BMW i3 have on average a 200 km of range during the 4.600 cycles, it means that by the time it reaches 920.000 km it'll still have 80 % of its initial battery capacity left.

Samsung SDI 94 Ah battery cell full specifications - PushEVs

Samsung SDI is presenting at the 2018 Energy Storage Europe in Germany its latest high-energy density 111 Ah battery cells for energy storage purposes along with its 94 Ah cells used in...

Introduction of Samsung SDI's 94Ah cells

Li-Ion SDI94 Battery Cell 3.7V 94AH, Samsung NMC - Introduction
Technical information Complete datasheet Original name Samsung SDI
94Ah. Battery chemistry is NCM (nickel-manganese-cobalt). Recommended
initial and subsequent charging is to 4,15 V. The minimum voltage is
2.7 V. Maximum discharge curre

Li-Ion SDI94 Battery Cell 3.7V 94AH, Samsung NMC | shop.GWL.eu

It's not the first time that we found Samsung SDI 94 Ah battery cells
on sale at online stores, but it's the first time it happens at a
reputable and well known source. The price at ev-power.eu isn't very
friendly (162,69 € without VAT), but it's always nice to at least have
the opportunity to buy the battery cell from third-party suppliers if
