Screen Resolution Problem - Windows XP Home and Professional

If the new resolution you've set isn't support or you have any other problems, restart windows and repetively press F8 right after the BIOS is loaded. It will show you a debug menu. Select VGA mode option. Published: Jan 14, 2009 ·   Last Updated: Jan 17, 2018 0 Comments.

Set the resolution manually on XP - Windows Forum - Spiceworks

Use the drop-down menu or slider next to Resolution (XP calls it Screen Resolution) to pick a different resolution setting. In most circumstances, the best choice is 800 by 600 pixels or 1024 by 768 pixels, possibly higher if you're using a 19-inch or larger monitor. The "best" setting is highly subjective to your personal preferences and your equipment.

How to Adjust the Screen Resolution Setting in Windows

"setvideomodehint" works just with the resolution scale of the guest's screen settings. For examle, it can set resolution from 800x600 to 1280x960. I found some solution. View -> Switch to Scale Mode. After that I can choose in guest's screen setting any resolution, up to 6400x1200. But! It works only with VBox 4.2.4!

virtualbox.org • View topic - Guest WinXP screen resolution

The resolution is limited but you should get better than 800x600! Instead you can enable remote connection to the vm (from within the vm OS) and connect to the vm using remote desktop from the host. This should let you run full screen. If it is still 800x600 there is something odd about your vm install.

Hyper-V resolution issues

Re: Screen resolution problem after Windows XP restoration I still have a problem though. that's the NTLDR that's missing. When I installed (Wind XP cd rom - including service Pack 2) that Dell sent me recently i had the problem of the screen that I fixed but still i had so many other drivers that I couldn't install (sound).
