SensoMineR is a free software intended for sensory analysis from both academic and corporate institutions. SensoMineR is an easy and powerful solution that tackles the following problems: characterization of the products, panel performance assessment, links between sensory and instrumental data, consumer's preferences, napping evaluation, optimal designs.

SENSOMINER: A PACKAGE FOR SENSORY DATA ANALYSIS - LE ...

We propose a new package for sensory data analysis, named SensoMineR. SensoMineR is implemented in the R programming environment and can be accessed at the following addresses: <http://sensominer.free.fr> or <http://cran.r-project.org>. This package produces graphical displays of data that are simple to interpret, and it also provides syntheses of results issuing from various analysis of variance models or from various factor analysis methods accompanied with confidence ellipses.

Specific Sensory Science Add-ons. There are hundreds of add-on packages available for R which provide functionality ranging from multivariate statistics to time series analysis, genetic algorithms and neural networks. The Comprehensive R Archive Network (CRAN) 3 provides a thorough database for each package. In the past few years, some packages have been developed which are specifically designed to aid the sensory practitioner.
