Ship Engine Room Machinery And

A junior engineer should know thoroughly about the placement of various machines even before going on board and this is taught during pre-sea training and other academic courses. Here is an aid to gain more of this knowledge and the next few articles will provide a bird ' s eye view of the various platforms which form a central part of the machinery arrangement in a ship ' s engine room

Ships Engine Rooms - Ships Main Engines & Central ...

On a ship, the engine room is the compartment where the machinery for marine propulsion is located. To increase a vessel's safety and chances of surviving damage, the machinery necessary for the ship's operation may be segregated into various spaces. The engine room is generally the largest physical compartment of the machinery space. It houses the vessel's prime mover, usually some variations of a heat engine. On some ships, there may be more than one engine room, such as forward and aft, or po

Engine room - Wikipedia

There is no hard and fast rules regarding the location of each item of equipment, but normally the engine room consists of several levels having different machinery such as auxiliary engines or diesel generators, a boiler, the inert gas plant, fresh water generator, and purifiers, fuel and oil pumps and storage tanks, the engine control room, waste incinerator, and several other common paraphernalia like electrical panels at various levels.
