In point-and-shoot cameras, it ' s more common for manufacturers to advertise the zoom rating of a lens (10x, 40x, etc.), whereas DSLR and mirrorless lenses will be advertised by their focal length...

Ditch the Kit: How to Choose a Lens for Your DSLR or ...

While "DX" lenses can be physically mounted on any Nikon film or digital SLR that support the "AI" exposure indexing feature (produced from 1977), there will be some degree of vignetting when used on film cameras, depending on zoom setting. All Nikon full-frame "FX" DSLRs have a DX-compatible mode that, by default when a DX-format lens is attached, crops the captured frames to the DX format and adjusts the viewfinder to reflect the smaller capture area.

Lenses for SLR and DSLR cameras - Wikipedia

Although single-lens reflex cameras have been available in various forms since the 19th century with the film as a recording medium, the first commercial digital SLR with an image sensor appeared in 1991. Compared to compact cameras designed to aim and shoot, SLR cameras typically allow the use of interchangeable lenses.

## SLR Photography Guide

Macro zoom lenses are among the most versatile for DSLR cameras, with a wide range typically around 40-200mm. At 70-300mm, this Tamron lens is ideal for handheld shooting, particularly nature, wildlife, sports, and portraits. Like any macro lens, images will come back sharp and highly focused—almost too focused, if there is such a thing. Tiny, close-up images of insects and flowers are also possible, although, depending on the size of the subject, you may not be able to capture its ...

## The 8 Best Lenses for DSLR Cameras of 2020

Most SLR lenses have manual focus rings that move the focus group using a direct mechanical coupling. In contrast most mirrorless cameras

Modern interchangeable lens cameras – both mirrorless and SLR – utilize electronic contacts to exchange information between the camera and the lens. This information includes the lens in use, the focal length, aperture, and focused distance, and it aids the camera in determining exposure and other values.
