But We Try Harder...

Scientists used DNA to bring us a step closer to the quantum computing revolution. The method could unlock room-temperature superconductors.

An engineering breakthrough using DNA could unlock the quantum computing revolution
Could let computers work at warp speed, save energy, and even make trains fly. Scientists have used DNA to overcome a nearly insurmountable obstacle to engineering materials that will revolutionize ...

Overcoming the "Impossible"
With DNA to Building

HONOREE OF 2022 COLUMBUS CELEBRATION WEEKEND

Chemists have used melamine to create an inexpensive and energy-efficient way to capture carbon dioxide, an advance that could one day be scaled down and employed in vehicle exhausts.

Inexpensive melamine used to capture carbon dioxide in energy-efficient process

He has a Bachelor of Chemical Engineering and has also completed the Executive Program at the Stanford University Business School. In 2012, Mr Watts became a Graduate Member of the Australian ...
