Structural Silicone Glazing (SSG) is a curtain walling method that utilizes silicone sealants to adhere glass, ceramic, metal or composite panels to supporting framing members by means of a peripheral adhesive joint. In SSG curtain walls, silicone sealants serve not only as a weather seal, but also act as a structural bonding element, eliminating the need for exterior retainers and covers.

Structural Silicone Glazing: Life Expectancy of more than ...

Structural silicone glazing (SSG) is the use of specific silicones to bond glass and metal panels to the structure, via a metallic sub frame, without mechanical fixation. An SSG system can be designed to withstand live loads (wind load, line loads) and in some cases dead loads (weight of panel and imposed loadings).

Silicone Bonding - Structural Glazing Ltd

using nonlinear analysis of hyperelastic material that provides significant improvement to structural silicone glazing (SSG) design in high performance curtain wall systems.

Next-generation Structural Silicone Glazing

Structural Silicone Design in Cold Bent Application An existing cold bent application shown is also modeled for the peak strain in the SSG, figure 9. It is determined from FEA calculation, the peak strain is about 20% near the corner of the SSG. No structural silicone failure, structural or leakage has been observed in this cold bent application.

Durability of Structural Silicone Sealant in Cold Bent ...

AAMA SSGDG-1-17, the Structural Silicone Glazing (SSG) Design Guidelines, reviews a glazing that offers a unique appearance and simplicity of construction that often cannot be achieved any other way. Prior AAMA publications included TSGG-04, two-sided structural glazing for skylights, and CW-13-85, a structural glazing design guide.

AAMA Releases New Design Guide for Structural Silicone Glazing

Structural. Ultra-Glaze SSG4000 structural glazing adhesive is a one-component, high-strength neutral cure silicone elastomeric adhesive designed and tested for structurally glazed curtain wall applications. The material is supplied as a paste, which cures into a durable flexible silicone rubber upon exposure to atmospheric moisture. Buy Ultra-glaze SSG 4000E.

Ultra-glaze SSG 4000E - ARBO

This paper presents an advanced engineering evaluation, using nonlinear analysis of hyper elastic material that provides significant improvement to structural silicone glazing (SSG) design in high...

(PDF) Next generation structural silicone glazing

Basic Uses. Proglaze SSG is designed to meet the stringent performance needs for both 2- and 4-sided structural and protective glazing, including cap, heel or toe bead. Whether it is a unitized curtain wall manufactured in plant or a fieldglazed project, Proglaze SSG offers fast through cure and exceptional tensile strength to meet the most stringent building codes.

Silicone Sealant for Structural Glazing | Tremco Proglaze SSG

Structural Silicone Specialists - Founded in 1986 and operating from our modern 27,000 square foot factory in Telford Shropshire. Structural Glazing Ltd is the most experienced & largest specialist silicone bonding company in the UK.

Structural Silicone Specialists - Structural Glazing Ltd

It's hard to say whether the beauty of the 1620/1620 SSG (structural silicone glazed) Curtain Wall System is in the slim, sleek 2" sightline or in the performance. Built on the strength and reliability of the flagship 1600 curtain wall platform, the 1620/1620 SSG Curtain Wall System is an excellent choice for low- to mid-rise applications.

SSG Curtain Wall System, 1620 Structural Glass Wall ...

Structural glazing sealants recommended for this application are identified in the next section of this manual. This manual is intended to give guidance on the proper design and use of Dow silicone sealants in structural glazing applications.

Structural Sealant Glazing Technical Manual - Asia

Insulating glass used in structural glazing must have silicone units. Opacified spandrel must have trim in the back of the opacifier to ensure glass-to-silicone adhesion. The compatibility and adhesive characteristics of the structural silicone are to be confirmed in the early stages of design.

Silicone Structural Glazing - Guardian Glass

Structural Silicone Structural Insulating Glass Silicone Weatherproofing silicone (non structural) • Structural silicones are applied in facades, roofs, windows, doors, solar collectors, photovoltaic modules and internal partition walls to fix glass elements to metallic frames • Only certified silicones are proven to

Structural Silicone Glazing - GPD

SSG: Maximizing Silicone's Inert Flexibility and Durability Structural silicone glazing, the ability to safely use adhesively bonded glass as a means to construct a curtainwall, forever changed modern construction, providing architects with the opportunity to create unprecedented designs. Of course, architects seized

STRUCTURAL SILICONE - Webflow

Structural Glazing Create ambitious buildings with stunning designs, made to withstand the most challenging climates, temperatures and conditions - with GE Silicones Structural Glazing Sealants. The GE Silicones SSG product family includes one and two-part 100% silicone based structural sealants and adhesives.

Structural Glazing Sealants | GE Silicones

Structural Silicone Glazing (SSG)is the use of specific silicones to bond glass and metal panels to a structure, via a metal sub frame, without mechanical fixation. An SSG system can be designed to withstand live loads (wind load, line loads) and in some cases dead loads (weight of panel and imposed loadings).

Structural Silicone Glazing - CM Glass, Hamilton, NZ

ASTM C1401 Stan- dard Guide for Structural Sealant Glazing is the most complete reference to the design considerations for struc- tural silicone glazing. This document provides an excel- lent overview of the practice along with a full list of historical references regarding the subject.

ctbuh.org/papers

ThermSSG Structural Silicone Glazing System Launched While fully-captured curtain walls are relatively straight-forward to install and fit a wide array of building types, Two-Sided and Four-Sided Structural Silicone Glazed (SSG) systems provide a compelling aesthetic choice that offer unique design freedoms.

ThermSSG Structural Silicone Glazing System Launched

SSG4650 UltraGlaze sealant is a next generation solution designed to enable the most ambitious structural glazing façades. With 30 psi tensile design strength and high flexibility, it's here to help you push the boundaries of building design.
