The moon orbits the earth once per month, and the earth orbits the sun once per year. This happens because all bodies with mass in the universe attract each other. The earth's pull on the moon...

**Interactions in the Sun-Earth-Moon System - Study.com**

When the Earth comes between the full moon and the Sun along the ecliptic, a lunar eclipse occurs. Observing the Moon from Earth, there is a sequence of phases as the side facing us goes from completely darkened to completely illuminated and back again every 29.5 days. As the Moon orbits Earth, tides align with its gravitational pull.
