In a nutshell, The Clockwork Universe tells how the world progressed from 1600, when philosopher Giordano Bruno was burned at the stake by the Church for proclaiming that the earth was just one of an infinite number of planets, to 1705 when Isaac Newton was knighted by the Queen of England for his discoveries in physics, one them being how how gravity maintained planets' orbits around suns - basically proving what cost Bruno his life. In the 17th century the modern world was born.

Isaac Newton has been recognized as a prominent opponent of the clockwork universe theory, though the theory has often been wrongly attributed to him. Edward B. Davis has acknowledged Newton's belief that the clockwork universe theory wrongly reduces God's role in the universe, as reflected in the writings of Newton-supporter Samuel Clarke. Responding to Gottfried Leibniz, a prominent supporter of the theory, in the Leibniz-Clarke correspondence, Clarke wrote:
