Almond eyes are shaped like an almond laid on its side with the outer portion of the eye being larger and rounder and the inner corners of the eye are narrower. This is a highly desired eye shape as it does lend itself well to a variety of makeup styles.

8 Different Types of Eye Shapes - Headcurve

This eye shape has a natural "winged" look at the corners, so following the natural lash line can help enhance it. Compton also loves a soft, smoky eye on upturned eyes: "Apply a light matte shade from the inner corner and stop above the pupil of your eye," she says. "Use a medium-matte shade on the remaining half of the eyelid and blend for a ...

Which Of 6 Eye Shapes Do You Have + Makeup Tips For Each

The Shape of the Eye is a well-written, perceptive account of one family's journey as a family including one daughter with, and one daughter without, Down Syndrome. It is a nice mix of nonfiction, memoir, near-poetry, and persuasive writing.

The Shape of the Eye: A Memoir by George Estreich

To determine eye shape, imagine a straight, horizontal line extending through the centers of both eyes. If the outer corners of your eyes are above the line, you have upturned eyes. If the corners are below it, you have downturned eyes.

How to Determine Eye Shape (with Pictures) - wikiHow

There are six main eye shapes - round, monolid, hooded, downturned, upturned and almond - and they're all fabulous in their own way. You may have also heard the following descriptions for your...

What is my eye shape? The best tips for each, according to ...

Light is focused into the eye through the clear, dome-shaped front portion of the eye called the cornea. Behind the cornea is a fluid-filled space called the anterior chamber. The fluid is called aqueous humor

Parts of the Eye - American Academy of Ophthalmology

The eye is not shaped like a perfect sphere, rather it is a fused two-piece unit, composed of a anterior (front) segment and the posterior (back) segment. The anterior segment is made up of the cornea, iris and lens.

What is the exact shape of the human eye? - Quora

The lens is a transparent biconvex structure in the eye that, along with the cornea, helps to refract light to be focused on the retina. By changing shape, it functions to change the focal length of the eye so that it can focus on objects at various distances, thus allowing a sharp real image of the object of interest to be formed on the retina. This adjustment of the lens is known as ...

Lens (anatomy) - Wikipedia

The shape of your eyes can reveal more about your personality than you might think, and cultures all over the world seem to believe in this type of science. While to some people, eyes look like nothing more than colorful balls that allow them to see the world, but to others, eyes truly reflect one's soul. Below, we will go over what the size, shape, color, slant, and even distance between the eyes reveals about your personality.

~~What Do The Shape of Your Eyes Reveal About Your Personality?~~

Normally your cornea, the clear outer lens or "windshield" of the eye, has a dome shape, like a ball. Sometimes the structure isn't strong enough to hold its round shape and it bulges outward, like...

~~Keratoconus: Causes, Symptoms, Diagnosis, and Treatment~~

The shape of the actual eyeball will affect vision. It is possible for the eyeballs to be either shortened or elongated. An elongated eyeball is also referred to as myopia or nearsightedness. With this condition, people have difficulty seeing objects that are far away.

~~Understanding Different Eye Shapes: Which Do You Have ...~~

"The Shape of the Eye is a memoir of a father's love for his daughter, his struggle to understand her disability, and his journey toward embracing her power and depth. Estreich is raw and honest and draws us each into a new view of what it means to be 'human' and what it means to be 'different'.

~~The Shape of the Eye: A Memoir: Estreich, George ...~~

The eyes are the most prominent facial feature. As a result, the shape of the eye especially influences how people perceive a person's beauty. There are many different shapes of an eye, all which can be enhanced to make a person appear more youthful and attractive. In many cultures, the almond eye is considered the most beautiful and favorable.

~~The Many Different Shapes of The Eye | TabanMD ...~~

If the crease is hidden behind the eyelid then you have "Hooded" eye shape. Then comes the turn of White within the eyes. If there lays the white portion above or below the iris then you have beautiful "Round eyes". Otherwise, you will tell the world that the shape of your eyes is "Almond"

~~Different Types of Eye Shapes: Which One you have?~~

Emmetropia refers to an eye with a cornea and lens that focuses light precisely on the retina. The normal human eyeball measures about 24-25 millimeters in diameter, or approximately 1 inch, according to T. Montgomery, optometric physician. The eye is slightly flattened at the front and back in a roughly spherical shape.

~~The best glasses for your face shape and skin tone~~

The eye, like the camera shutter, operates in the same way. The iris and the pupil control how much light to let into the back of the eye. When it is very dark, our pupils are very large, letting in more light. The lens of a camera is able to focus on objects far away and up close with the help of mirrors and other mechanical devices.

~~Anatomy of the Eye | Kellogg Eye Center | Michigan Medicine~~

The shape of the lens is controlled by the action of the ciliary body, altering the focusing power of the lens as needed. The cornea and lens focus an image onto the retina at the back of the eye. If the image is projected too far in front of the retina, it causes the visual defect called myopia, or nearsightedness.
